

Collection 2025

The New Collection

Public Outdoor Creations is a leading manufacturer of high-quality street furniture. Our collection stands out for its refined finish and timeless design. All products are developed and manufactured in-house at our factory in Heeten, the Netherlands.

We are proud to present our new collection. It has been expanded with a wide range of new models, including the Wadi Modules and the Climate Tree Box – a hybrid, self-regulating tree planter with a water buffering capacity of no less than 6,000 liters. All new models feature unique designs and are made from sustainable materials. In addition to standard projects, we also specialize in customized solutions. A great example is the largest bridge park in Europe, which we realized in Izegem, Belgium. This project includes 90 modules installed in various configurations.

We hope this flyer inspires you. Our consultants and engineers are happy to connect with you to help bring high-quality outdoor space projects to life.

Kind regards,
Team Public Outdoor Creations

Climate Tree Box Modules

Public Outdoor Creations proudly introduces the hybrid tree planter. This self-regulating planter is specially designed to be placed above underground cables and pipes. It can be connected to the rainwater drainage system and has a total water buffering capacity of 6,000 liters. The Climate Tree Box is available in various configurations.

The Urban Green Room

The Urban Green Room is a unique combination of elements that creates a welcoming, green oasis in any urban environment. The pergola structure adds a sense of enclosure and intimacy, making the space feel both inviting and comfortable. Available in various configurations, the Urban Green Room can be tailored to suit different locations and needs.

Parklets

We recently delivered several parklets for the City of Rotterdam. These mini pocket parks are flexible in design and replace one or more parking spaces with a green outdoor area. Parklets can be equipped with our Root Care system for optimal plant and tree maintenance.

Mobile Gardens, Izegem Belgium

Green Stage

The Green Stage is a modular system to designed to create grandstands. The Green Stages are available in various configurations, offering flexibility to suit any location or event. This grandstand presents a unique opportunity to create a striking and characterful meeting place. The combination of a stage, green planter boxes, and a pergola structure makes the Green Stage truly unique.
